#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because the drawings are numbered incorrectly (i.e. the drawings are numbered figs. 4, 8, 12, 16, 20, 24, 28, 32, 36 and 40, therefore numbered figures 1-3 and others are missing. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Perry '393 in view of Jacobsen '930. Perry discloses a swimming exercise device containing most of the elements of the claims including, a means for channeling a passage of water (chute 80), means for coupling a swimmer to the channeling means (harness 72 and tether 70).

Perry fails to teach a means for variable restriction of the passage of water. However, Jacobsen discloses a swimming exercise device which teaches a means for variable restriction of the passage of water (figure 11, adjustable aperture 84).

Therefore it would have been obvious to incorporate the means of Jacobsen in the device of Perry for the purpose of changing the degree of water resistance the device provides, especially since both the device of Perry and the device of Jacobsen are directed to swimming devices which can vary the amount of water resistance.
